

PHOTOIONIZATION

ODOUR CONTROL

NEURATEK PILOT UNIT

Welcome to NeutraTek Odour Solutions LP, the exclusive licensee and dynamic force behind the *NEUTRALOX* Photoionization (PI) Technology!

Validate Performance at Your Facility

NeutraTek, the exclusive licensee in the Americas for photoionization odour control technology, provides odour control units that eliminate foul air from wastewater treatment and related facilities. The pilot program allows clients to evaluate the system's performance under actual operating conditions while collecting site-specific data.

***1-Week Trial | \$5,000 + freight to site
Additional Weeks | \$1,000 / week***

Complete Pilot Testing Support

Our pilot program includes:

- Installation and start-up assistance
- One-week standard test period
- Pilot test report
- Pickup from site

Why Pilot Test?

- Verify odour removal performance on your specific application.
- Evaluate operation under actual site conditions.
- Collect site-specific performance data
- Assess system suitability before full-scale implementation.
- Experience the ease of setup, minimal maintenance, and high performance.

Let's talk about your project!

Contact NeutraTek Odour Solutions LP to discuss pilot testing opportunities for your facility.
